**Precise Underground Marking Corporation positioned for Growth**

*Hires Director of Operations, Business Development Manager with wealth of experience*

Milwaukee, WI (June 22, 2009) – Precise Underground Marking Corporation (Precise Underground), providing accurate and safe marking of underground facilities such as fiber optics, electrical wires, sewer / water lines, and gas lines, announced today the hiring of Mark Haas as its Director of Operations and Warren Scurlock as Contract Manager and Business Development Director.

Both Haas and Scurlock have a wealth of experience in the utilities industry and will work to position Precise Underground as a premier damage prevention/risk management supplier in Wisconsin.

"Precise Underground has a 15 year reputation of providing quality service to our customers which includes WE Energies," said Charles Goins, President, Precise Underground. "The addition of Mark and Warren to our team provides Precise with the additional resources to further grow our customer base and grow the business. The collective experience of these two gentlemen in the utilities industry, along with their business savvy and relationships will be an added benefit to Precise."

Prior to joining Precise Underground, Mark has worked as a business development consultant for Illinois-based Intren and spent 30 years at WE Energies in various management positions.

Scurlock brings more than 25 years of marketing, system design and project management experience to Precise Underground. He has worked in all areas of sales and management and his vast background will help to ensure each project undertaken by Precise Underground will be completed successfully.

"The future of Precise Underground looks bright, said Goins. "We are positioning ourselves to be a leader in the industry. We have a good product, a good team, and with Mark and Warren a solid business strategy for growth."

**About Precise Underground Marking Corporation**

Precise Underground Marking Corporation was established in 1994 to provide underground facility locating services in Milwaukee. Precise Underground provides timely and accurate risk management service for gas and electric lines, sewer and water lines, fiber optic cables and cable television.
